

Cloud Load Balancing

#GCPsketchnote
@PVERGADIA THECLOUDGIRL.DEV
10.5.2020

Our application is a hit, users are growing!!

Well yes! but we need a solution that can

- Scale
- Reduce Latency
- Increase Security
- Reduce Cost

That's a good thing right?

IT OPS SAM

DEVELOPER ERIN

Cloud Load Balancing!

What is Cloud Load Balancing?

FULLY DISTRIBUTED SOFTWARE DEFINED NETWORKING (SDN)

- Single Global Anycast VIP (IPv4/IPv6) across region
- Worldwide Capacity
- Cross-region failover and fallback
- Fast autoscaling
- Single point to apply global policies
- 1 Million+ QPS
